

MEME101

MEMEPAPER

SYNOPSIS

This document shall serve as a guide and a reference document to tele-guide both the team and the holders (Users of Meme101 Token) at every given point in the life span of this epoch Crypto currency project.

It will serve as a constant reminder for the pathway and social contract that the development team of Meme101 project has subsume themselves to, and also be a checker for the community, should they feel lost, perturbed or discombobulated about the direction of the project at any given time. This shall be our bond and a pact between the team and the public to foster commitment, honesty and sincerity to this project.

INTRODUCTION

Meme101 is a meme token like no other EVER created, built on the rapidly rising **SOLANA BLOCKCHAIN NETWORK**, it aims to be a CYNOSURE that underscores the ability of a meme token to transition the crypto currency industry, regardless of the negativity that has been associated with the meme coin movement, caused by the GET RICH QUICK DEV'S. Who often scheme their way into the pockets of unsuspecting community members, only to abandon them in the middle of nowhere once satisfied with their unethically financial harvest.

Nicknamed and pride itself to be **“THE SAVIOUR OF ALL MEMES”**, \$Meme101 is out to redefine and edify the meme token space, through transparent and innovative and ethical processes that will evidently create a pathway for the crypto industry in the shortest time possible, when our method becomes public.

To put it in plain terms, **Meme101** is set out to correct the negative narrative of Meme Tokens being a Denigrate enterprise, fit and left for gamblers who are ready to risk it all and head home with their face drop, or win it all, while leaving the losers in their pool of tears. And the team is determined to launder the battered image of meme adopters and projecting the Meme Eco-space as one that can be trusted and professionally invested in, to benefit even the corporate world, contrary to the uncomplimentary perception generally held by many about Meme token Eco-Space today.

Meme101 is here to prove that Meme Tokens with a clear path definition can equally become a top tier financial asset, that can lead the crypto currency industry like Bitcoin, Ethereum & the rest of the tier one cryptocurrency are doing today. Whether it adopts a Decentralized Finance Defi method, NFT or RWA functionality.

The key to achieving this is the objective and integrity of the team, and the contribution intended to add to the industry. And for Meme101, the team have come together to create something unique, anchored on some very important features of what the 21st century real money and asset should be which are...

1. Acceptability by the community
2. Consistent with a clear & defined People Centric Objective
3. Community ownership.
4. Innovation and compatibility with Latest Technological Advancement.

WHY EMBARKED ON THIS JOURNEY?

To Contribute Our Quota To The Global Crypto Movement.

Today, the **SEC** and many national & sub-national government making regulations to guide the operability of crypto currency, is a pointer and a testament that we have now arrived a new financial paradigm. One that seeks a financial equilibrium for all, and decentralization of financial ownership and dismantling of the global financial monopoly held by a few oligarchy across the world. And for many, this is the good news of Cryptocurrency

The most significant aspect of this monetary evolution is the Blockchain technology, and its cryptographic ancillary benefit which it unleashes to the technology space. A system that combines both artificial intelligence (AI), and a stoic impenetrable encrypted Block-files and Node-codes to secure its transactional ledger and decentralized infinite lookup. Although this is some good news, but truth remains that this journey is a million miles away from getting to its destination. And it is upon this premise, that the 101Factory Team has decided to put up its first unique Token (**Meme101**) in what will be an array of innovative development in an Eco-Space self-styled **MemeNivers** as we proceed.

It is an ideation that combines all the positive achievements and failures of the best cryptographers so far, and created a SWOT analysis of the combined system, just to improve on the weak points, so we can have something Beautiful, Durable, Accessible & self-Driven and transparent for the public to own.

INDUSTRY CURRENT CHALLENGES:

Just like everything new, the Meme coins walk of fame and cryptocurrency in general has not come without its fair share of challenges. Yet the major challenge has been posed by the GET RICH QUICK DEVELOPERS, who had turned the Meme space into a near pyramid scheme, causing and creating fear that is preventing investors from bring in institutional money into the Eco-Space. So, in essence, TRUST of THE SYSTEM has been the singular major challenge.

SOLUTION IT SEEKS TO PROVIDE:

To change the Negative perception about Meme tokens, by creating a token that even the global corporate systems like the fortune 500 companies can accept, trust and adopt as a means of transaction in this rapidly evolving financial system.

THE GOOD NEWS IS...

\$Meme101 has come to change all of that. With a decision by a group of young, talented and ambitious developers, networking themselves across four continents of the world (**Asia, America, Europe & Africa**), with the ambition to change the negative narrative about Meme coins, and that's how **Meme101** was born.

METHODS, FUNCTIONALITY & BLOCKCHAIN NETWORK CHOICE

METHOD & FUNCTIONALITY

\$Meme101 is a Defi & deflationary token which is design to manually decrease simultaneously in concert with its gross market capitalization at launch. The deflation however ends when it gets to the cryptographic minimum as calculated into its design.

The team has created a specific wallet where 10% of all fund raised will be used to buy back the token during the lowest market ebb, and burn them off circulation permanently, thereby reducing the circulating supply by a significant percentage, to strengthen the value of the circulating tokens in addition to the value that would be created by utility and adoption.

BLOCKCHAIN NETWORK OF CHOICE

SOLANA (SOL)

The team has intelligently chosen the **SOLANA Blockchain Network** as its Launchpad and network of choice for this introductory phase. This would be until we switch things up to our own Blockchain (Blackc101 Chain), already in the works for the second phase of the project. However, SOLANA was chosen for its solidity, credibility and efficiency & volume speed, aided by its novel **Parallel Transaction Throughput**, which enhance its transaction per Second TPS, which stands exceptionally at 65,000 transactions per second on its test-net record. And its low gas and transaction fee TF, which is among the lowest in the industry today. SOLANA was chosen as it falls in line with the ideology of the 101Factory which aims to democratize the meme industry through affordability and ease of access to all.

We would equally launch on the BSC network and create a **BRIDGE**, which will enable ease of transaction on the cross-chain network of both systems. Additionally, it is safe to adumbrate that we are also designing our own launch-pad, which shall provide our users the ability to **Farm and Stake** their token at a profit yield. And receive any other preferable token of choice that the staking farm shall make available through its pairs, even while working for the success and full adoption of the **\$Meme101** project.

OUR OFFERING TO THE COMMUNITY

The \$meme101 Team has adopted the charity model as one of its way of giving back to the community and society, because in essence, the end game is all about making sure that poverty which is the universal pandemic and a global scourge is collectively treated. Therefore, 10% from the Fair-launch has been earmarked to be re-channeled back to the community, and a selected global demography who are plagued with one challenge or the other.

PROJECT'S MISSION

To create a Meme token that will have the credibility, Trust & innovation that can win and attract the confidence of the corporate institutional finance, and to bring more adoption and partnership that is currently lacking in the Meme Ecospace today.

PROJECT'S VISION

The vision is that, \$Meme101 will become the leading meme token that will be the number 1 in both utility and adoption in the first eighteen (18) months from the date of our fair launch, by creating innovative pathway for other industry peers to follow.

ABOUT THE TEAM

The 101Factory Team, Developers of \$Meme101 is a group of young and talented Crypto OG's made up of Cryptographers, A Quantum Accountant, Top End Programmers, Global marketers of repute, who has been behind multiple crypto projects with huge success stories worth billions of dollars in sales and transactional volume. The team is drawn from different countries globally for the sole purpose of creating a product with distinct characteristics.

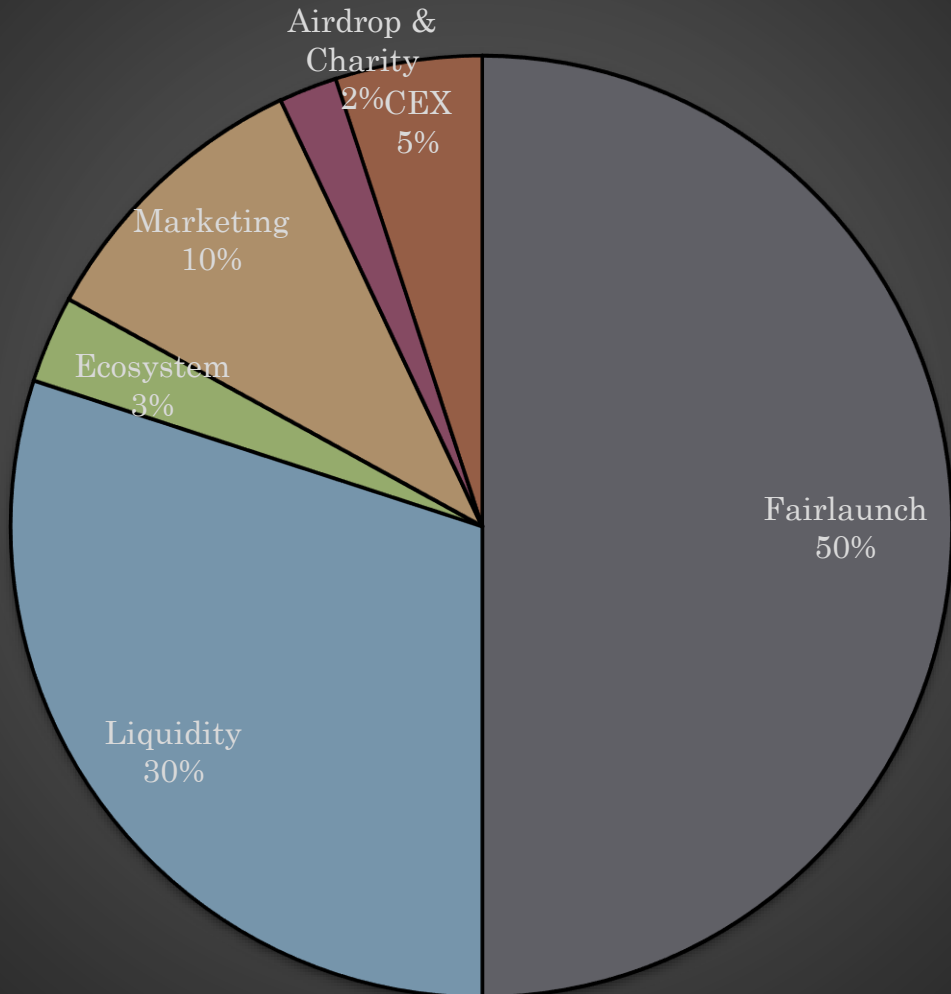

The team is led by a Crypto OG who simply goes by his industry alias known as BANDARAS

ROAD-MAP

A summary of the Roadmap for the first phase of our project (\$Meme101) has been updated on the website <https://www.meme101.net> but we shall keep it at that to protect our innovative pathway from the trolling eyes of the plagiarist who are on the lookout for project they may hijack and replicate a parody version out of.
